SUMMARY

Product designer and frontend developer specializing in UI/UX design, with proficiency in Figma, React, HTML, CSS, and JavaScript. Currently advancing backend and cloud skills to become a full-stack developer, with a strong focus on delivering scalable and user-centric digital solutions.

EXPERIENCE

UI/UX Intern | Wizher

January 2022 - September 2025

- Designed and optimized user flows and interfaces, improving usability and early product adoption based on user feedback and iterative testing.
- Translated user research and feedback into intuitive UI designs, reducing usability errors and creating a cohesive visual system for web and mobile.

Graphic Designer | Freelance

April 2019 - September 2025

- Designed 10+ websites and mobile interfaces, creating intuitive and visually appealing experiences that consistently met client goals.
- Developed 15+ scalable design systems and custom templates, streamlining client workflows and reducing project turnaround time.

FEATURED PROJECTS

Trash Trackr | portfolio making group 2

March 2025 - September 2025

- Directed the creative vision and UI/UX design for **TrashTrackr**, shaping brand identity, dashboards, and mobile interfaces, leading to recognition as **one of 3 awarded teams** out of **3,300+ APAC participants**.
- Produced the full launch package—logo, icons, motion assets, and visuals—driving **40% higher engagement** and securing the **People’s Choice Award**.

EDUCATION

Bachelor of Science in Computer Science | Holy Angel University

2026

- Google Developer Groups: Cloud Developer Lead** (May 2025 - Present)
- Google Developer Groups: UI/UX Lead** (May 2025 - Present). Conducted hands-on UI/UX workshop for 10+ student teams and designed the GDG HAU website, showcasing projects to 150+ attendees across major campus events.

AWARDS & HONORS

2025 Google Solutions Challenge APAC Top 3 (People Choice Awards) | Google

2025

- Awarded by Google for developing “Trashtrackr,” an AI-powered mobile app that provides smart waste disposal guidance. Designed and built with Flutter, Firebase, and Gemini as part of the 2025 Google Solutions Challenge APAC. Achieved Top 3 ranking in the region for innovation, impact, and user engagement.
